The Tech Adept's Moves

- ■ **Universal Programmer:** *(You have this move by default)* When you **make a new piece of equipment**, roll +Wits. On a hit you make it. On a 10+, it works and keeps working. On a 7-9, it will only last for the scene. In either case, choose a quirk:
  - – The device works much more slowly than expected
  - – The device requires more of a resource than expected
  - – The device has a side effect when used
- ☐ **Read the Web of Fate:** When you **enter the virtual world to Read the Web of Fate**, roll +Grace. On a hit, you can determine the degrees of separation between two objects or people. On a 10+, you can also get a general idea of the path between them.
- ☐ **Hacking:** When you **Outmaneuver, Outpace, or Outfox in the virtual world**, you may roll +Wits instead of +Grace
- ☐ **Ghost in the Machine:** When you **enter the Virtual World physically**, you may bring other willing Mages along, and exit at any terminal you can find.
- ☐ **Things Speak:** When you **examine an interesting technological or magical object**, roll +Wits. On a 10+, you may ask up to 3 of the following questions, on a 7-9, ask 1.
  - – What strong emotions have been most recently associated with this?
  - – What's wrong with this, and how might I fix it?
  - – How frequently has this been handled?
  - – Where did this come from?
  - – How might this be dangerous?
  - – Who designed this?
- ☐ **Percussive Maintenance:** When you **Impose Your Will** on a machine, roll +Will. It works better. On a 10+, tell the GM how. On a 7-9, the GM will tell you how. On a 6-, the GM will tell you how, and why this is terrible for you.
